

# Take Flight Learning

## Taking Flight with DISC

The Taking Flight with DISC training program offers a high energy, engaging experience for participants as they learn why they click with some and clank with others. Employees who are self aware are more likely to maximize their talents, better recognize and manage their challenges, and produce better results. Self-aware employees also work better with their colleagues, which enhances teamwork at every level of your organization and shapes your culture. In return, your company experiences higher morale, lower turnover, and greater profits.

*Taking Flight with DISC* is fun to learn, inspirational to experience, easy to remember, and practical to apply. Participants will be engaged from start to finish through a highly interactive format designed by DISC experts Merrick Rosenberg and Daniel Silvert, Co-authors of *Taking Flight!, Master the DISC Styles to Transform Your Career, Your Relationships... Your Life*. Rosenberg and Silvert have facilitated thousands of DISC programs around the world for nearly 20 years. *Taking Flight with DISC* provides facilitators with step by step guides in illuminating the insights, power, and humor of DISC to ensure a presentation that delights participants and spurs future program sales.

### **DISC style awareness can transform organizations:**

- ❖ Understanding the styles enables individuals maximize strengths and better manage challenges.
- ❖ The styles help team members to better manage conflict, reduce stress, and improve relationships between coworkers.
- ❖ DISC awareness dramatically improves communication, which leads directly to higher levels of productivity and morale.
- ❖ Understanding DISC enables coworkers to build trust through genuine appreciation of what each DISC style brings to the workplace.
- ❖ The birds breathe new life into DISC model. They add colorful energy and life to training programs and create an engaging experience for participants.

We apply what we remember and the Taking Flight birds are “sticky.” People retain style insights more effectively with the birds than with the letters D-I-S-C. They add colorful energy and life to training programs and create an engaging experience for participants.
